E-spirit 730

NEW GENERATION OF ELECTRIC BOATS

We've taken the well-proven electric boat planing hull, combined outstanding performance with a spacious cockpit and moulded it into an extravagant design. The refined elegance is complemented by a rich list of standard equipment.

WHAT MAKES E-SPIRIT 730 SPECIAL?

STYLE CREATOR

E-spirit has a bold look and impressive, forward-looking style. Fascinate yourself with the exciting contours and premium design of this boat and enjoy the unique cruising performance coupled with an outstanding range!

IN TOP FORM

Applying the vacuum infusion manufacturing technology used in racing, we have reduced the hull weight by nearly half, so the stability of the flat bottom is accompanied by an impressive cruising performance. The electric boat's improved hull shape doesn't shrink, yet generates even less drag than before when cruising. The wide stern also provides exceptional stability and a uniquely comfortable cockpit, which is quite rare for an electric boat.

INNOVATIVE, SPORTY, EXCLUSIVE

Like the rest of the boat, the command centre has been reconsidered and all mediocre solutions have been banished. The sporty captain's bucket seat is positioned high above the waterline, offering a safe view on all sides, and the user-friendly digital dashboard, equipped with premium tools, has been fitted with useful accessories such as a wireless phone charger, a handy drinks cooler and a document and key holder compartment.

Grab the E-spirit 730's ergonomic, adjustable steering wheel and let the boat's effortless speed, lithium-charged acceleration and finely tuned, precise handling amaze you.

INNOVATIVE SOLUTIONS

Designed specifically for electric cruising, the new generation of planing hull offers the whole family a fun-filled experience, as the high cruising speeds achieved with low energy consumption open up new horizons for family trips. Whether you want to enjoy the activities and gastronomic events available from the lakeside marinas or go wakeboarding or tubing, you and your family can experience an unrivalled sense of comfort, sportiness and elegance on board the E-spirit 730.

Comfortable foredeck that provides safety even when the boat is gliding.

The raised deck provides a safe view even from the comfortable, sporty captain's bucket seat.

Special, high-tech bow construction for low drag and wave resistance.

Spacious cabin for 2 persons for 1-2 days cruising.

Unique stern structure specifically designed for electric boats, for high stability and low drag.

1. In keeping with the minimalist design, the dashboard is dominated by a 7-inch intuitive display.
2. Huge bathing platform with spacious built-in fender storage for the spa experience.
3. The 3-position backrest can be adjusted to different positions for a comfortable rest.
4. Even a large group of friends can picnic comfortably in the cockpit.
5. The cockpit can be converted into a double berth in no time.

CLEVER DECK DEVELOPED FOR ELECTRIC BOATING

The sophisticated elegance is complemented by a rich list of standard equipment.

Standard features include a large bimini, a maintenance-free wood effect decking and premium upholstery.

1. Comfortable cushions made of exclusive upholstery fabric on the foredeck for sunbathing. We've also thought of a safe place to store your smartphone.
2. The exceptionally long bathing ladder makes it easy to climb out for young and old alike. On the bathing platform, you can comfortably dip your feet in the water or sunbathe right next to it.
3. The 2-metre-long bimini, made of a special material that folds into a spoiler shape, provides pleasant shade even in the hottest hours of the day.

Turn the stern bench of your electric Stickl boat into a really comfortable place to sit with the superbly practical 3-position roll bar!

There is also huge storage space under the cockpit.

The wide steps give you safe access to the foredeck.

Folding cleats for a stumbling-free experience.

Can also be fitted with an electric remote-controlled anchor winch.

The cushions on the foredeck are covered in premium water and moisture resistant upholstery, and there's a separate storage compartment for your mobile phone.

STRONG, SILENT, MAINTENANCE-FREE ELECTRIC MOTOR

GIVE THE LITHIUM IONS A GO!

Push the accelerator forward and dazzle your passengers! The electric motor's special feature is that it delivers torque without delay, and flies the lightweight hull through even the wildest waves!

HOW WILL IT FEEL?

You'll feel the adrenaline rush of limitless gliding pulsing through your veins as you not only see the sunlit landscape, but hear the sounds of nature: the lapping of water, the laughter of girls, the soft cries of seagulls. One thing you can be sure of during your e-boating experience: the motor noise is guaranteed not to disturb your relaxation.

Underwater electric motors are available with power outputs from 10 to 19 kW, built-in direct drive motors are available with power outputs from 40 to 125 kW.

In all cases, the propeller and software are optimised for the combination of marine motor chosen.

Our 12 years of experience in yacht building and 10 years in exports, as well as the feedback of 250 satisfied customers, prove to us that our developments have resulted in safe peak performance and, over and over again, an impressive efficiency.

HIGH-TECH LITHIUM BATTERY SYSTEMS

Combining a heavy and outdated lead-acid battery with a high-end hull would be a shame, wouldn't it?

The necessary amount of energy is therefore provided by fully sealed, high-end lithium batteries designed for industrial use, which are several times more durable than those used in the automotive industry, have a long service life and do not require any special cooling or heating.* This means more power is left over and the battery is much less dependent on other systems on the boat.

The batteries are custom sized to fit the boat, hidden under the floor to both increase stability and save you additional valuable space.

QUICK CHARGING

Whilst the sun is shining and the sky is blue, the charging speed is always a key issue. One of the outstanding advantages of the lithium battery system is its rapid re-chargability, which can be optimised with a programmable fast charger suited to the needs of the owner and local conditions.

MONITORING SYSTEM

The boat is equipped with a professional monitoring system to guarantee long battery life and safety. The GSM remote monitoring system is also built to fit your boat, so you can keep your e-boat safe wherever you go.

*Assuming that Electroboats are operated at 0-50 degrees Celsius outside temperatures.

LUXURY EVEN IN THE CABIN

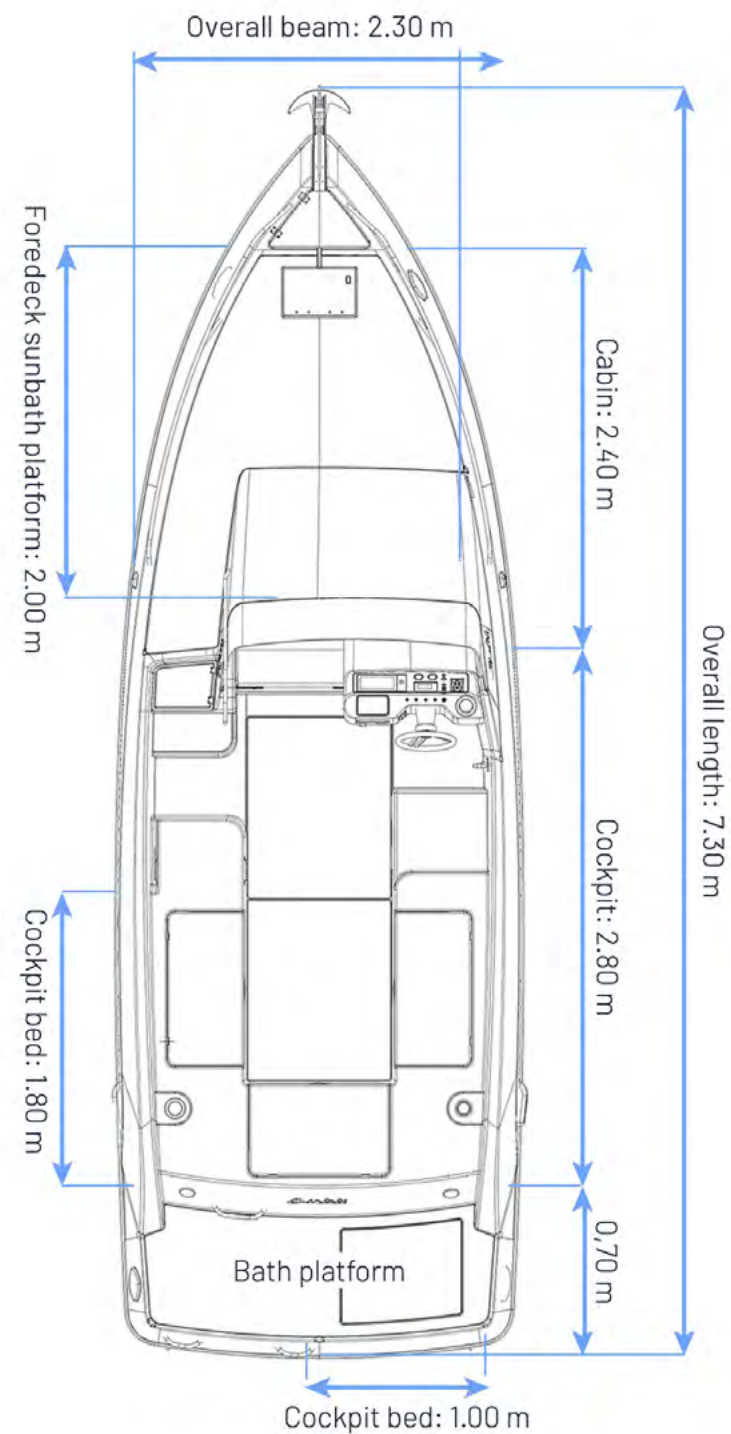

1. The comfort of the cabin, which sleeps up to 2 people, is ensured by a double bed, a 24" TV, a lockable storage cupboard and diamond-quilted wall panelling.
2. The bed extension that can be pulled out from its hiding place converts the berth into a comfortable double bed.
3. The well-ventilated cabin with opening windows can be installed even with a hidden chemical toilet.

SPECIFICATIONS

| | |
|---------------------|---|
| Overall length: | 7,30 m |
| Waterline length: | 6,70 m |
| Maximum beam: | 2,30 m |
| Waterline beam: | 2,15 m |
| Depth: | 1,35 m |
| Maximum draft: | 0,65 m |
| Kerb weight: | 1.250 kg< |
| Motor power: | 10 - 19 kW (underwater motor) 40 - 125 kW (direct drive motor) |
| Passenger capacity: | 9 |
| CE-class: | C (wave height up to 2 metres) |

CUSTOMISED ACCESSORIES ADAPTED FOR ELECTRIC BOATING

*Go extra!
Choose unique, logo branded accessories
for your Stickl boat, developed on the
basis of customer feedback to create an
atmosphere of comfort and elegance for
you and your guests on board.*

1. Elegant sink hidden in the stairs with 44-litre built-in fresh water tank.
2. Bar cabinet with two sets of glasses: elegant looks for any occasion.
3. Easy-to-use 30-litre fridge with drawers, adjustable drawer separator and digital temperature display.
4. Beverage coolers: the 3 built-in beverage coolers can be switched individually and keep 0.33 l cans cold even after opening.
5. The recessed shower is ready for use in a flash.
6. Teak or ash cockpit table that can be transformed into a double berth in no time.
